TORRENCE D.J. WELCH, Ph.D.
SENIOR MANAGING CONSULTANT

tdwelch@engsys.com

Dr. Welch is a Senior Managing Consultant at ESi. Dr. Welch holds a Ph.D. in Biomedical Engineering awarded jointly by the Georgia Institute of Technology (Georgia Tech) School of Engineering and the Emory University School of Medicine in Atlanta, GA. His areas of expertise include the biomechanics of human injury, vehicle accident reconstruction, slip-and-fall events, occupational injury, reactive muscle activity, and human balance control and stability. Dr. Welch has offered expert testimony in the fields of accident reconstruction and injury biomechanics in Federal, State, and local Courts throughout the United States.

Dr. Welch has over 20 years of biomechanics research experience, studying human movement on multiple levels.

- *Injury* – the forces present on the body during automotive collisions; mechanics – the effects of forces on the bony and soft tissues underlying human movement;
- *Coordination* – the activation of muscles in functional groups called muscle synergies;
- *Control* – the mechanisms used by the nervous system to control standing balance and to learn new balance tasks;
- *Performance* – the effects of supplements on sport and exercise performance

He also has experience in human motion and gait analysis; electromyography (EMG); the computer modeling of biomechanical systems; the mechanical, biochemical, and ultrasound characterization of biological soft tissue; biomedical ultrasound imaging; and statistical and wavelet analysis. Dr. Welch performs biomechanical analyses for cases involving automotive collisions, slip/trip and fall events, falling objects, occupational injury, and other incidents leading to human injury. He performs vehicle accident reconstruction analyses for collisions involving single vehicles, multiple vehicles, and pedestrians. Dr. Welch is published in numerous publications on topics related to automotive collision-related injury and human standing balance control, and actively maintains collaborative research relationships with several academic institutions.

Areas of Specialization

Human Injury Analysis
Injury Causation
Injury Mechanisms
Injury Tolerance
Traffic Accident Reconstruction
Occupant Kinematics
Restraints and Safety Equipment
Rollover Biomechanics
Vehicle Driver Identification
Vehicle-Pedestrian Accidents
Bosch CDR Technician
Impact Biomechanics
Occupational Injury/Workers' Compensation
Product Safety
Sports and Fitness Equipment
Nighttime Visibility
Slip/Trip and Falls
Human Balance Control and Recovery
Surface Electromyography (EMG)
Anthropomorphic Test Device (ATD) Testing
Full-Scale Vehicle Testing
Computer Modeling

January 2021

Education

Georgia Institute of Technology & Emory University School of Medicine, Atlanta, GA

- Doctor of Philosophy in Biomedical Engineering, 2008

Tulane University, School of Engineering, New Orleans, LA

- Master of Science in Biomedical Engineering, 2003
- Bachelor of Science in Biomedical Engineering, 2003 (*Summa Cum Laude)*

Professional Licenses

ACTAR #2773

Additional Training

Traffic Accident Reconstruction 1 and 2, Northwestern University Center for Public Safety, 2008

Business Development for Engineering Consultants, Harry Keshet, PhD, 2008

Marketing for Litigation Consultants, Harry Keshet, PhD, 2012

Using the 3DSSPP Program, University of Michigan Center for Ergonomics, 2012

Traffic Accident Reconstruction 3, Northwestern University Center for Public Safety, 2013

Bosch Crash Data Retrieval Technician, University of North Florida Institute for Police Technology and Management, 2013

HVE Forum, 2016

Injuries, Anatomy, Biomechanics & Federal Regulation, Society of Automotive Engineers, 2017

Advanced Crash Reconstruction Utilizing Human Factors Research, Northwestern University Center for Public Safety, 2018

Energy Methods and Damage Analysis in Traffic Crash Reconstruction, University of North Florida Institute for Police Technology and Management, 2019

Positions Held

Engineering Systems Inc., Norcross, GA

- Senior Managing Consultant, March 2020 - Present

Rimkus Consulting Group, Inc., Atlanta, GA

- Principal Consultant, Biomechanics Division, January 2013 – March 2020

Exponent, Inc., Phoenix, AZ

- Senior Associate, Biomechanics Practice, September 2008 – December 2012

Presentations

Dr. Welch has presented as an invited speaker at conferences for a variety of esteemed organizations. Dr. Welch is also an approved instructor offering a suite of courses for CE and CLE credits, covering topics related to injury biomechanics and traffic accident reconstruction. A list of available courses and past presentations can be provided upon request.
