

Macan Doroudian

PhD, PE, GE
Senior Managing Consultant

As Senior Managing Consultant Dr. Doroudian has about 30 years of experience in the fields of civil engineering, geotechnical, foundation, water resources and earthquake engineering.

Prior to joining ESI, in 2018, he worked on assessment of earthquake damage for residential and commercial buildings, design water retention and detention systems such as levees and dams, assessment of levees and dams failure, evaluate slope failures, evaluated excavation and retaining wall failures, evaluate earth-movement, soil settlement, hydrocollapse and expansive soil heave induced damage, evaluate flood induced damage, flood hazard evaluation, perform advance soil mechanics laboratory testing, and evaluate geotechnical and flood control structural systems. He has also acted as part-time faculty to teach civil engineering undergraduate and graduate courses at the University of California, Los Angeles (UCLA).

Since joining ESI, Dr. Doroudian has been active in investigations involving landsliding, wildfire damage, flood hazard assessment, perform hydrological and hydraulics evaluation, soil characterization, ground movement and settlement, horizontal directional drilling damage, pipeline damage assessment, seismic ground motion evaluation, seepage evaluation, and perform active landslide repair and construction.

Dr. Doroudian is active in many technical and professional societies and has published over 50 articles in refereed journals and conference proceedings.

Education

Ph.D., Geotechnical Engineering, University of California, Los Angeles (UCLA), 1997

M.S., Geotechnical Engineering, University of California, Los Angeles (UCLA), 1993

B.S., Structural Engineering, University of California, Los Angeles (UCLA), 1991

Licenses & Certifications

- State of California P.E. License 62177

Contact Information

mdoroudian@engsys.com

(949) 233-0547

ESi Irvine

15235 Alton Parkway, Suite 120
Irvine, CA 92618

Areas of Specialization

- Geotechnical Engineering
- Flood Hazard Evaluation
- Pipeline Damage Assessment
- Wildfire Investigations
- Earth Movement
- Commercial and Residential Structures
- Flood Water Sediment Transport
- Civil & Structural Engineering
- Storm Damage Investigation
- Construction Vibration and Damage Assessment
- Dam and Embankment Levee Evaluation
- Geotechnical Field and Laboratory Testing
- Ground Motion and Seismic Hazards
- Earth Movement, Landslides, and Slope Stability
- Retaining Structures
- Subsurface Pipe Leaks and Moisture Intrusion

- State of Arizona P.E. License 51184
- State of California Geotechnical Engineer License 2815
- State of Nevada P.E. License 031086
- State of Colorado P.E. License 0062076
- State of Oklahoma P.E. License 34032

Positions Held

Engineering Systems Inc., Irvine, California

- Senior Managing Consultant, 2018–Present

Exponent, Inc., Irvine, California

- Managing Engineer, 2001–2018

Bing Yen and Associates, Irvine, California

- Project Manager, 1998–2001

University of California, Los Angeles

- Post-doctoral Fellow, 1996-1997

Professional Affiliations/Honors

American Society of Civil Engineers (ASCE)

- Member since 2003

ASCE Geo-Institute (G-I) Los Angeles Chapter

- Chair, (2023-2024)
- Member since 2017

ASCE/EWIR Standards Committee – KSTAT (Saturated Hydraulic Conductivity)

- Member since 2006

Earthquake Engineering Research Institute (EERI)

- Member since 2019

Association of State Dam Safety Officials (ASDSO)

- Member since 2014

American Society of Civil Engineers (ASCE) San Diego Section

- Trieste Drive Emergency Slope Repairs – Outstanding Geotechnical Project Award, 2025

El Camino College, Los Angeles

- Academic Achievement in Mathematics, Science and Mathematics Division, El Camino College, 1987.

University of California, Los Angeles (UCLA)

- Part-time Faculty, Department of Civil and Environmental Engineering, University of California, Los Angeles, 1997-2020

Project Experience

Investigations

Construction

- Performed site-specific investigation and design of hundreds of monopole towers and several multi-leg towers for the cellular telephone industry. The design tasks involved field investigation and borings, laboratory testing, analysis of shallow and deep foundation for seismic and wind loads, seismic hazard evaluation, static and seismic slope stability analysis, liquefaction analysis, analysis of design parameters for retaining walls, site grading preparation and earthwork recommendations, and construction observations and inspection of foundation during placement of reinforcement and concrete slurry for AT&T, T-Mobile, Sprint, and American Towers Cell Tower Design, 1999 – 2001.
- Performed geotechnical investigation, seismic design, foundation evaluation and earthwork grading and field observations during construction overexcavation and compaction for the Long Beach Fleet Center, California, 2000
- Performed various design and construction tasks for the Lubrizol Deer Park chemical plant located in Deer Park, Texas, 2019-2021. Tasks included site characterization, analysis of the short-term undrained stability of banks during construction, analysis of long-term drained stability of the channel banks during the life of project, assessment of rapid drawdown seepage conditions and stability, design of the size and type of sheet pile wall to have sufficient capacity to withstand the design moment and shear loads, evaluating the performance of the sheet pile with respect to corrosion during the life of project, design of the sheet pile wall drainage system, and providing engineering services during construction.
- Performed slope stability analysis, prepared a summary report, designed repair, logged caissons, and oversaw field construction activities for the Trieste landslide repair, 2024.

Dam Safety

- Performed various tasks for a stormwater detention basin in Sand Canyon, Simi Valley, California, 2000. Tasks included field investigation and soil sampling, site characterization, development of seepage flow paths and flow nets, evaluation of potential for piping and high exit gradients, determination of shear strength of subsurface and compacted fill material, long-term static and seismic settlement assessment, ground motion evaluation, liquefaction analysis, static and seismic slope stability assessment under steady-state seepage and maximum flood elevation condition, and compaction quality control during construction of the 475-foot-long by 24 foot- high embankment

- Performed design tasks involving geotechnical site characterization, seepage and slope stability evaluation, inlet/outlet hydraulic structures, landfill settlement, sediment erosion evaluation, and report preparation for the design of a large stormwater detention dam at the Sunrise Mountain Landfill, Las Vegas, Nevada, 2002.
- Investigated catastrophic failure of the Ka Loko Dam, Kauai, Hawaii, 2006. Logged borings, performed geotechnical site characterization, supervised soil laboratory testing, performed seepage and slope stability modeling, and hydraulic dam breach analysis.

Landslides and Slope Stability

- Evaluated the cause and contributing factors to the catastrophic La Conchita Landslide, Ventura County, California, 2005.
- Performed geotechnical site characterization, evaluated hydrologic/rainfall evaluation, performed slope static slope stability analysis, Oso Landslide investigation, Oso, Washington, 2014.
- Characterized a landslide below Trieste Drive in Carlsbad, California, by means of subsurface investigation, installation and monitoring of inclinometers and piezometers, laboratory testing, evaluation of seepage conditions, slope stability analysis, and assessment of the cause and origin of the landslide, 2020-2024.

Pipeline Safety

- Investigated slope failure-induced oil pipeline rupture, Pyramid Lake, CA, 2006. Evaluated rainfall records, , performed slope stability analysis, and prepared a summary report.
- Investigated slope failure-induced gas pipeline rupture near Pittsburgh, PA, 2020-2024. Evaluated construction methods, rainfall records, and historical patterns of landslide activity, developed maps and cross sections, performed slope stability analysis, and prepared a summary report.
- Investigated causes of oil pipeline failure, Weld County, Colorado, 2025. Evaluated small-strain soil characteristics, modeling of pipeline bending and fatigue performance resulting from both internal oil pressure pulses and external traffic loading.

Retaining Walls

- Site characterization to evaluate the stability of slopes above the channel during construction, performed stability analysis for various retaining wall systems that included soil nailed walls, cantilever walls, and tieback walls for Segunda Deshecha Flood Control Channel, San Clemente, California, 1999-2000
- Washington Avenue bridge seismic retrofit, Los Angeles, California, 2001. Investigated potential for bridge abutment failure due to strong seismic shaking and provided stabilization recommendations for the bridge founded on silty and sandy soils.
- Investigation of MSE wall failures, oil sands facility, northern Alberta, Canada, 2021. Reviewed construction records, wall design, finite element analysis of key components, boreal winter construction methods, weather records, and timing of failure to determine probable root cause of failures.

Flood Hazards

- Indian Bend Wash, Scottsdale, AZ, 2008. Performed hydrological, hydraulic, and geotechnical evaluation of existing flood control levee system and provided design recommendations to assist local flood control district levee accreditation efforts.
- AT&T telecommunication facility, Palmdale, California, 2019. Evaluated the flood hazard potential associated with the construction of the subject facility during the design storm and assessed the combined soil and hydraulic lateral design pressures associated with the 100-year storm event on the subject enclosure. Evaluated the potential magnitude of changes in water surface elevation resulting from construction of the facility and its effect on surrounding properties.
- Rey Wildfire Damage Assessment, Santa Barbara County, California, 2021. Performed field investigation, aerial photo analysis, terrain analysis, and rainfall analysis to evaluate the effects of the wildfire on Forest Service roads in and adjacent to the fire area.
